SUMMARY

I am a recently graduated Master in Computer Science who studied at the Royal Institute of Technology in Stockholm, Sweden. My focus was on computer security. Since the age of 17, I've also worked part time as a professional programmer. Mostly I've worked a lot with web development, but I've also dabbled with scraping and some mobile app development. The past few years I've also focused on security. I've performed some minor penetration tests, as well as contributed by finding and disclosing security vulnerabilities to different companies.

I am confident in my ability as a software engineer, backed by a combination of theoretical and practical experience from having studied and worked at the same time. My keen interest in the subject will ensure that I always keep learning.

WORK EXPERIENCE

Current JULY 2017	<p>Software Engineer at WELLNOW GMBH <i>Berlin based Startup</i></p> <p>Tasked with maintaining and developing new features for the Wellnow platform as the company rapidly grows. Polyglot development in a modern microservice infrastructure. As a full stack developer in a small team I got to interact with most parts of the system and infrastructure. I handled most of the backend APIs and server infrastructure of the company.</p> <p>Specific projects: geospatial querying using postgis, Microservice Orchestration and CI/CD rewrite using Hashicorp products, cache for fast availability querying, deployment service, application and infrastructure logging via ELK stack, complete onboarding and offboarding from a legacy system to a new.</p> <p>Technology bingo: Docker, Consul, Nomad, Terraform, Packer, Vault, AWS, Serverless, Typescript, Expo, GraphQL, MySQL, Redis, React, NodeJS, Python, Golang, Scala, Rust, Elasticsearch.</p>
JAN 2015 - JULY 2017	<p>Self-Employed at BLACKNODE <i>Programming and Penetration Testing</i></p> <p>I performed penetration testing focused on Network-, Application-, and Web Security, as well as took on more specialized programming projects. I reverse engineered an Android application and assessed store-networks for vulnerabilities for a major coffee-shop company (100+ stores). I built multiple web-scrapers with infrastructure for a major Scandinavian retail chain to gather information about competitors' products and prices.</p>
MAY-OCT 2015	<p>Part-time Security Consultant and Programmer at BAMBORA <i>Mobile Payment Company</i></p> <p>Short term hire after finding vulnerabilities in the mobile payment platform delivered by Bambora. Performed penetration tests and prototyped new features to improve security at the mobile division of Bambora. Added encryption for locally stored user credentials to better secure the user data stored on a phone against e.g. theft. Prototyped platform-authentication for clients using BankID. Focused on web and mobile security. Android and Python development.</p>
AUG 2013 - MAY 2015	<p>Part-time Security Consultant and Programmer at PAYSON AB <i>Online Payment Platform</i></p> <p>Tasked with finding vulnerabilities in Payson's systems. Programming frontend and back-end in C# .NET. In addition to helping out with new functionality on the website, I had my own project involving web scraping and regularly data mining thousands of sites.</p>
DEC 2007 - DEC 2013	<p>Part-time Programmer at AWAVE AB <i>Web Development and Programming Consultancy Shop</i></p> <p>Programming websites in PHP and .NET. Mostly "backoffice" administrative applications, with lots of obtuse SQL queries. Created three iPhone apps in Mono Xamarin. Desktop applications for invoicing and accounting on Windows. Server administration and setup in Linux and Windows. Security auditing/pentesting of websites.</p>

EDUCATION

JANUARY 2017	<p>Master of Computer Science, KTH Royal Institute of Technology, Stockholm Major: Computer Security Thesis: "Anonymous Javascript Cryptography and Cover Traffic in Whistleblowing Applications" Supervisor: Prof. Sonja BUCHEGGER</p>
JULY 2013	<p>Bachelor of Computer Science, KTH Royal Institute of Technology, Stockholm Thesis: "Voting Mix-Net" Supervisor: Douglas WIKSTRÖM</p>

VOLUNTEERING WORK

Dec 2016 - Feb 2018

SECURITY WITHOUT BORDERS

Volunteering Organisation

At SWB I currently help with maintaining and coding new features for the main www.securitywithoutborders.org website.

SCHOLARSHIPS AND CERTIFICATES

2010 Cambridge Certificate of Proficiency in English (CPE): Grade A

2009 Cambridge English: Advanced (CAE): Grade A

LANGUAGES

SWEDISH: Modersmål (Mothertongue)

ENGLISH: Fluent

GERMAN: Basic Knowledge (A2)

COMPUTER SKILLS

Advanced Knowledge: PYTHON, Java, .NET (C#), PHP, JavaScript, Linux, SQL, Webapp security, Webscraping, HTML/CSS

Basic Knowledge: ANDROID, C/C++, Rust, Ruby, Prolog, Haskell

INTERESTS AND ACTIVITIES

Technology, Open-Source, Programming, Cryptography, Computer Security

Video-games, Philosophy, Baking

PROJECT SHOWCASE

These are some open source projects I've worked on. A more complete project list can be supplied upon request. I also have more projects on my github account, which you can find here: <https://github.com/Tethik>

Burn After Reading

A simple to use webservice for securely sending secrets. It works by encrypting texts in javascript, sending the key in such a way that the server should not see it. The server then stores the text in memory until either the recipient decides to "burn" the text or the time expires. I use it to send passwords and other secrets that I don't want to be kept saved in e.g. an email inbox or chat thread. Coded in javascript and python.

Demo: <https://burn.blacknode.se>

Src: <https://github.com/Tethik/burn-after-reading>

Tamperfree

A tool to verify static content on tor hidden service websites. It uses selenium to emulate the tor browser bundle in order to make a verifier that looks and acts just like a normal tor user would. By doing this I hope to achieve indistinguishability from a real user, so that the server can not differentiate between the verifier and real user. Mostly a proof of concept. Coded in python.

PYPI Python Packages

Throughout 2016-2017 I published some smaller python packages in the official python package index.

- Badger. A simple commandline program to generate SVG badges offline.
<https://pypi.python.org/pypi/badger>
- Flask-Session-Captcha. A captcha generator for the Flask framework.
<https://pypi.python.org/pypi/flask-session-captcha>
- simplegeoip. A simple wrapper library for getting geolocation from an ip.
<https://pypi.python.org/pypi/simplegeoip>

Github Open Source Contributions

The following table is automatically generated every month using data from the Github API. It shows which open source projects I've contributed code to via Pull Requests on Github.

Stars	Repository	Languages	Additions / Deletions
★ 33022	scrapy/scrapy	Python/HTML/Roff	(+207/-71)
★ 17125	pypa/pipenv	Python/Roff/Shell	(+1/-1)
★ 7332	elastic/beats	Go/Python/Objective-C	(+1203/-1)
★ 5660	pyeve/eve	Python/Makefile	(+29/-13)
★ 5451	kennethreitz/records	Python/Makefile	(+79/-8)
★ 1307	modoboa/modoboa	Python/JavaScript/HTML	(+1/-1)
★ 501	UnitedIncome/serverless-python-requirements	JavaScript/Python	(+5/-2)
★ 365	jxson/front-matter	JavaScript/Makefile	(+2/-2)
★ 225	paulmillr/readdirp	JavaScript	(+1/-1)
★ 212	shawnclean/Mandrill-dotnet	C#/PowerShell	(+1245/-1217)
★ 175	labstack/echox	Go/HTML/JavaScript	(+5/-2)
★ 133	maxcountryman/flask-seasurf	Python	(+4/-4)
★ 116	arabold/serverless-sentry-plugin	JavaScript	(+1/-1)
★ 95	hashicorp/terraform-aws-nomad	HCL/Shell/Go	(+54/-10)
★ 82	mattermost/docs	HTML/Python/Batchfile	(+4/-4)
★ 64	jrxFive/python-nomad	Python	(+26/-0)
★ 46	Netflix-Skunkworks/raven-python-lambda	Python	(+44/-16)
★ 34	AndreiRegiani/falcon-jsonify	Python	(+23/-11)
★ 29	glesys/API	PHP/Shell/Ruby	(+94/-0)
★ 26	hbldh/pybankid	Python	(+61/-5)
★ 26	securitywithoutborders/newsletter		(+61/-62)
★ 14	securitywithoutborders/website	CSS/JavaScript/HTML	(+3589/-637)
★ 6	vortec/hug_sentry	Python/Makefile	(+23/-2)
